

Formula 66

A Safe and HAP-Free Solvent That Can Replace (Substitute for) Toluene

Toluene can cause very serious medical problems** and is classified by the EPA as a Hazardous Air Pollutant (HAP)

*** Oncogenesis, miscarriages, blood discrasias, liver toxicities, etc.*

But Formula 66 doesn't cause these medical problems and it's HAP-free

Toluene is an excellent solvent in almost every application
And Formula 66 is as good or better a solvent than toluene in almost every application

Formula 66 is an excellent solvent for many polymers, resins, oils and greases

Formula 66 is available in cases of 4 x 1-gallons, in 55-gallon drums, or custom packaged
