

Formula 78H

A Safe and HAP-Free Solvent That Can Replace (Substitute for) Terpenes and Higher-Boiling Aromatic Solvents

Higher-boiling Aromatic Solvents can cause very serious medical problems** and are classified by the EPA as a Hazardous Air Pollutant (HAP)

** **Oncogenesis, miscarriages, blood discrasias, liver toxicities, etc.**

But Formula 78H doesn't cause these medical problems and it's HAP-free

Higher-boiling Aromatic Solvents are excellent solvents in almost every application

And Formula 78H is as good or better a solvent than higher-boiling Aromatic Solvents in almost every application

Formula 78H is an excellent solvent for many polymers, resins, oils and greases

Formula 78H is available in cases of 4 x 1-gallons, in 55-gallon drums, or custom packaged
