

## Formula 83

# A Safe and HAP-Free Solvent That Can Replace (Substitute for) Xylene

---

Xylene can cause very serious medical problems\*\* and is classified by the EPA as a Hazardous Air Pollutant (HAP)

\*\* Oncogenesis, miscarriages, blood discrasias, liver toxicities, etc.

**But Formula 83** doesn't cause these medical problems and it's HAP-free

---

Xylene is an excellent solvent in almost every application  
**And Formula 83** is as good or better a solvent than xylene in almost every application

---

**Formula 83** is an excellent solvent for many polymers, resins, oils and greases

**Formula 83** is available in cases of 4 x 1-gallons, in 55-gallon drums, or custom packaged

---

**Try a sample and see the results!**
